Senior SharePoint & Power Platform Developer

Professional Summary

Senior Power Platform and SharePoint consultant with 6+ years of experience modernizing enterprise collaboration and business process solutions across federal and enterprise environments. Specialized in replacing legacy InfoPath and SharePoint Designer workflows with scalable Power Apps and Power Automate solutions. Strong background in SharePoint Online administration, Microsoft 365 governance, security, and Power Platform ALM using Pipelines. Known for delivering maintainable, performance-focused solutions and partnering with stakeholders to streamline operations and reduce technical debt.

Professional Experience

Senior Technical SharePoint Specialist / Power Platform Consultant

ITC – USCIS (FOD) | Feb 2021 – Present

- Architect and develop SharePoint Online solutions aligned with organizational goals, leveraging modern site architecture, governance best practices, and Microsoft 365 capabilities.
- Build and enhance Power Apps (Canvas) and Power Automate workflows to automate complex business processes and improve operational efficiency.
- Review existing SPO sites and Power Platform applications, identify gaps, and recommend enhancements to improve automation, usability, and performance.
- Implement scalable, maintainable solutions using Power Platform ALM practices, including Pipelines, managed solutions, environment variables, and connection references.
- Collaborate with stakeholders to elicit requirements, analyze business needs, and translate them into technical specifications and solution designs.
- Partner with project managers to provide clear status updates, including risks, issues, deliverables, and upcoming milestones.
- Design and deploy SharePoint Online sites and Power Platform applications that adhere to DHS UX guidelines and Microsoft 365 design best practices.

- Apply governance, security, and compliance controls across SPO and Power Platform environments to protect sensitive data and ensure consistent user experience.
- Recommend new tools, integrations, and Microsoft 365 features to support evolving business and regulatory needs.
- Troubleshoot and resolve user-reported issues across SharePoint Online and Power Platform applications, ensuring timely resolution and improved user satisfaction.
- Deliver user training, documentation, and ongoing support to increase adoption and reduce support tickets.
- Prepare datasets using Power BI and Power Query to support dashboards and reporting needs across federal teams.
- Develop data-driven insights that help stakeholders monitor performance, identify trends, and make informed decisions.
- Recognized with two Certificates of Appreciation and an Attitude of Gratitude award for technical excellence and collaboration.

SharePoint Developer

MetroStar Systems – Department of State (PRM) | Feb 2019 – Nov 2020

- **Administered SharePoint 2016 and Office 365** environments, including sites, subsites, lists, and document libraries.
- **Developed business forms** using InfoPath, SharePoint OOTB forms, and SharePoint Designer workflows.
- **Maintained an Office 365 support site** to improve internal communication and issue tracking.
- **Resolved document library threshold issues** and optimized large content exports.
- **Configured permissions and security** to meet departmental compliance requirements.
- **Developed automated workflows** and coordinated testing and rollout with business users.
- **Provided SharePoint training** and hands-on support to increase adoption and productivity.
- **Supported migration from SharePoint to Dynamics 365** by configuring classic workflows, updating business logic, and managing security roles to ensure proper

access, data integrity, and continuity of business processes.
