Steve Dobbs

6150 Happy Hollow Dr. Milton, FL 32570

Self motivated, customer-focused, results-oriented Senior Critical Engagement Manager with extensive background in technical customer support and development on multiple platforms/products, design, implementation, and support of mission-critical IT infrastructure. Extensive experience in both government and commercial sectors. Expertise in Oracle Solaris, Linux, storage, networking, Oracle Cloud. Successes include:

- Architected disaster recovery plan for a customer in-situ while coordinating round-the-clock diagnosis of production-impacting situation.
- Became trusted advisor to IT management of multiple customers and account teams
- Received multiple awards for customer satisfaction
- Demonstrated additional product needs to affected customers, resulting in sales engagements
- Identified technical and procedural shortcomings and built plans for improvement of internal business processes.
- Developed multiple tools in a variety of computer languages

Professional Experience:

Oracle America, Inc. (Oct 2004 – Sept 2025)

- Senior Critical Engagement Manager
 - Managed Executive-level escalations for multiple lines of business for global customers, bringing together proper technical resources to solve complex problems that fell outside of normal processes.
 - Products involved include OCI, Private Cloud Appliance, ZFSSA, Cloud at Customer, OVM, Kubernetes, virtualized operating systems (linux, solaris, windows), customer and Oracle-provided networking, load balancers, firewalls, backup solutions, others.
 - Organized tiger-teams with personnel from development to sales in order to support customer needs.
 - Worked with Sales team to develop opportunities identified as part of engagements
 - Develop and present RCA documents and recommend internal procedure changes to avoid future incidents
- Principal Technical Engineer
 - Performed onsite and remote hardware and software diagnosis/support across multiple products and platforms
 - Acted as named technical contact for multiple large accounts for proactive & reactive engagements.
 - Provided proactive technical leadership for new IT solutions as well as ongoing support for existing implementations.
 - Participated in customer engagement planning and post-sales engineering efforts. Acted as sales team technical resource for pre-sales activities.
 - Developed tools in perl, python, bash/shell, javascript for use by the wider customer support organization using API. JSON, REST, SQL
 - Mentored junior members of support teams so they could earn product accreditation.

CherryRoad Technologies (Feb 2004 – Oct 2004) – Systems Administrator/Architect

- Contractor to US Navy for administration and system architect of mission-critical systems
- Held TS clearance.
- Planned & implemented rolling conversion to robust 3-tier system architecture for both unclassified & classified version of system.
- Automated previously manual processes for backup/recovery and other day-to-day operations
- Implemented disaster recovery plans in aftermath of hurricane for both unclassified/classified systems.

Network Telephones, Inc. (Nov 1999 – Feb 2004) – Senior Systems Administrator

- Senior Unix/Linux Systems Administrator of Telecom Company, including billing application admin
 - Developed automation tools in perl and sql for automation of billing tasks via API & direct database access
- Assisted planning and implementation of complete datacenter move with minimal customer impact.
- Implemented system monitoring tools for unix software and hardware monitoring. Developed/scripted additional monitoring modules for business specific needs
- Additional skills in DHCP, TCP/IP, DNS, Active Directory, LDAP, NAT, VLAN's, VPN, firewalls, routing/switching
- Developed tools in Visual Basic, SQL, C++, bash, Delphi, java
