

Michael Wolde

Professional Summary

With over 6 years of experience in SharePoint and Power Platform, I have led migrations from on-premises to cloud, built custom apps and automated workflows with Power Apps and Power Automate, developed data-driven dashboards in Power BI, and integrated diverse data sources with strong security controls to deliver scalable, user-focused digital solutions that improve efficiency, compliance, and collaboration.

Work History

DLB Associates - M365 Power Platform/SharePoint Developer

Neptune City, NJ

04/2025 - Current

- Designed and implemented a New Hire Training automation in Power Automate for the HR and Admin departments, streamlining the scheduling and notification process for onboarding events. Automated the retrieval of training data from structured sources and generated Teams invites and Outlook calendar events, ensuring seamless coordination and reducing manual effort.
- Created a Signature Flow automation in Power Automate to digitize and standardize the company's contract approval and signature process. Integrated dynamic approval routing, automated notifications, and document tracking, eliminating manual handling and improving compliance and turnaround time.
- Built a Power Apps-based Software Tracker application integrated with SharePoint lists to manage licensing, billing frequency, cost per license, administrators, and departmental usage. Enabled real-time tracking, reporting, and approval workflows, improving visibility for Finance and IT stakeholders.
- Led the development of a full SharePoint Online environment for the company's sister organization, including departmental sites and client-facing project sites. Designed site structures, permissions, and branding to support collaboration, knowledge management, and external file sharing.
- Partnered with cross-functional teams to automate approval processes, digitize forms, and modernize legacy workflows through the Power Platform ecosystem (Power Apps, Power Automate, SharePoint, and Power BI).

- Partnered with cross-functional teams to automate approval processes, digitize forms, and modernize legacy workflows through the Power Platform ecosystem (Power Apps, Power Automate, SharePoint, and Power BI).

Allstate - Power Platform Developer

Northbrook, IL

11/2023 - 11/2024

- Crafted customized applications using both model-driven and canvas app techniques within Power Apps.
- Streamlined workflows and automated business processes with Power Automate to boost operational productivity.
- Developed dynamic dashboards and visualizations with Power BI, enabling data-backed decision-making.
- Designed conversational AI tools with Power Virtual Agents to enhance user engagement and improve customer service.
- Built low-code, web-based user experiences through Power Pages, offering seamless accessibility.
- Integrated diverse data sources such as CSV, Excel, Dataverse, SQL databases, and SharePoint lists for comprehensive data management.
- Established strong security protocols, including encryption, user authentication, DLP, and role-based access control to safeguard data.
- Facilitated smooth integration across the Microsoft ecosystem, ensuring efficient collaboration and data sharing between Office 365, SharePoint, Azure, and other key platforms.

Certifications

Certified Microsoft Power Platform Developer

- Oversaw the administration and upkeep of Power Platform environments with a focus on stability and performance.
- Applied skills in HTML, CSS, and JavaScript to enhance development efforts within the Power Platform.
- Employed APIs to connect and synchronize external systems and services.
- Used Dataverse as a central hub for managing data in Power Platform solutions.
- Showcased expertise in leveraging the Dynamics 365 platform and its range of functionalities.
- Executed smaller projects to gain practical experience with various Power Platform tools and features.

New York Life Insurance - SharePoint/Power Platform Developer

New York, NY

10/2020 - 10/2023

- Transitioned on-premises SharePoint setups to cloud environments, using Power Automate and Power Apps to replace outdated tools and streamline processes.
- Skilled in developing custom components with SPFx, providing tailored SharePoint solutions to meet varied business requirements.
- Expertly managed SharePoint lists, views, and libraries, ensuring optimal organization and easy access to information.
- Employed PowerShell scripts to automate administrative tasks in SharePoint, significantly boosting operational efficiency.
- Worked closely with stakeholders and multidisciplinary teams to deliver SharePoint solutions centered around user needs.
- Created advanced Power Apps to modernize business workflows and replace legacy forms.
- Used Power Automate for workflow automation and seamless integration of various systems across the Microsoft ecosystem.
- Effectively used Dataverse to build and manage data models that power applications in Power Apps and Power Automate.
- Possess deep expertise in APIs and web technologies like HTML, CSS, and JavaScript, enhancing the capabilities of application development.
- Experienced in managing diverse data sources, such as CSV, Excel files, SQL databases, and SharePoint lists for comprehensive data handling.
- Implemented strong security protocols, including encryption, user authentication, DLP, and RBAC to safeguard information.
- Administered and maintained SharePoint environments, ensuring high performance and system stability.
- Demonstrated expertise in integrating SharePoint with Dynamics 365, enabling a unified view of customer data.

O'Reilly Auto Parts - SharePoint Developer

Springfield, MO

09/2019 - 09/2020

- Led migrations from on-premises SharePoint to SharePoint Online, focusing on maintaining data integrity and reducing downtime.

- Developed custom web components with SPFx, complementing out-of-the-box features to enhance SharePoint capabilities.
- Managed both on-premises and cloud-based SharePoint platforms, using PowerShell to simplify administrative tasks.
- Utilized Nintex workflows to streamline business operations, significantly improving process efficiency.
- Connected various systems within the Microsoft ecosystem, including SharePoint, Dynamics 365, and Power BI, to facilitate smooth data integration.
- Built Power Apps canvas apps for process automation, incorporating custom elements with HTML, CSS, JavaScript, .NET, and C#.
- Handled multiple data sources like CSV, Excel, SQL databases, and SharePoint lists, ensuring seamless data integration.
- Worked alongside stakeholders and cross-functional teams to gather requirements and deliver tailored solutions.
- Executed iterative user acceptance testing to refine and optimize Power Platform application functionality.
- Applied SharePoint best practices and governance, ensuring compliance with organizational standards.
- Created and deployed corporate intranet sites, implementing hub site associations for cohesive navigation.
- Authored detailed documentation and user guides for SharePoint solutions, ensuring clarity in technical specifications.
- Facilitated the migration of legacy systems to SharePoint, ensuring smooth transitions and secure data handling.
